

SUMMARY

Innovative Full-stack/ML Engineer with 5+ years of experience in design, development, testing, and deployment. Highly experienced in writing codes and algorithms as well as building complex neural networks through various programming languages. Possess an unbridled passion for software development with comprehensive knowledge of machine learning concepts and Full-stack technologies. Unmatched abilities to identify, understand, and translate program requirements into sustainable, advanced technical solutions through Python, JavaScript, C++, C# and other programs for continuous improvement of AI technologies.

EDUCATION

Hill College

Bachelor's Degree in Computer Science
2013 - 2017

SKILLS

- C++ / C# / Python / JavaScript / Java
- React / Django / Flask / Angular
ASP.NET / .NET Core / Node.js
Express.js / Nest.js / PHP / Laravel
- SQL / NoSQL / PostgreSQL
MongoDB
- ML / NLP / RESTful API / Serverless
API
- Amazon Web Service(AWS) / Microsoft
Azure Google Cloud Platform(GCP)
- Docker / Kubernetes / Jenkins
CircleCI / Github / Jira / Scrum
Agile Methodology
- Algorithm development / Machine
Learning Databases management /
Generative AI

PROFESSIONAL EXPERIENCE

Software Engineer

Codepaper Technologies | 2020 - Present

- Developed an AI based SaaS platform with CNN, LSTM, Transformer and other Sequence models on AWS using React, Django, PyTorch, Keras and Python.
- Developed a web application using C++, C#, Javascript, ASP.NET and AngularJS that allowed users to upload and search for files stored in a cloud-based storage system(Elastic Search).
- Participated in the design and implementation of CI / CD and DevOps processes for agile projects and worked with technologies and platforms such as Python, JavaScript, Node.js, GIT, Linux, Docker, Kubernetes, Ngnix, Jenkins, AWS, used debugging tools like React-DevTools for faster debugging and reducing debugging time by 50%.

Software Engineer

Pizza Hut | 2017 - 2020

- Developed an API using C++, C#, .NET Core and ASP.NET and SignalR that integrated with a third-party payment processing system and enabled real-time chat, secure and reliable transactions for an e-commerce platform.
- Developed a Customer Relationship Management System and Company Management System that can track inventory levels, manage supply chain, analyze and extract data from competitor websites using C++, C#, .NET Framework, SQL Server, Selenium, WCF, .NET Core, Angular and Azure Active Directory.
- Maintained a large web application using HTML/CSS, JavaScript, jQuery, PHP(Laravel) framework, and automated monthly supplier payments billing cycle using PHP and MySQL. Ran payment programs on a monthly basis and adjusted conditional business logic through a web interface.
